

DOOM & DELIVERABLES PRESENTS

Mayhem & Marketing Ops

STANDARD OPERATING PROCEDURES
& PLATFORM OVERVIEW

WHAT MAYHEM IS

Mayhem & Marketing Ops is the operating platform of the marketing department. It keeps one record per deal — every event, sponsorship, partnership, media flight and community commitment across all five brands — and hangs everything else off that record: dates with their reasons, money at three stages, outbound tickets, partner obligations, returns and proof, payments, tracking, and reports. Notion, the calendar feeds, and every export flow from the same book of record.

It exists because operational knowledge used to live in inboxes, trackers, and people's heads — and one buried deadline was one too many. In Mayhem, gaps become flagged chases with owners, deadlines surface on a shared calendar, and nothing depends on memory.

HOW WORK MOVES — THE SPINE

Everything follows one path. A deal enters through **Intake** and becomes a **record**. The record's dates arm the **house clock**, which writes deadlines onto the **Calendar**. Deadlines become **Tickets** — asks with owners and due-backs. Tickets go out by mail; what comes back lands in **Content & Results** as proof. Money flows through **AP**. The **Monday note** reports what moved and what stalled.

When something looks wrong, walk the spine: a missing deadline traces to a record with no date; a silent vendor traces to a ticket never sent; a wrong dollar traces to a record whose money went stale. And nothing skips the spine — work that arrives sideways gets a record first, or it does not exist.

THE LAWS OF THE HOUSE

- I.** One record per deal — its whole life in one place.
- II.** Nothing overwrites itself: conflicts surface for a decision, and every merge carries its source.
- III.** Proposal money is never shown as committed money.
- IV.** Dates carry their why; the engine rolls them off weekends.
- V.** Disclaimers are market-true — unknown coverage flags to Ethics.
- VI.** Email runs in TEST mode until it is flipped live — every send lands in-house until then.
- VII.** Superseded truth is archived, never deleted.
- VIII.** Names live in one room only — Contacts. Everywhere else, the system speaks in roles.
- IX.** The less manual entry, the better: the system suggests, pre-fills, mints and pulls — a human picks and confirms.

CONTENTS

1	Home — the operating pulse
2	Brands & the record dossier
3	Intake — the four doors
4	Tickets — the outbound machine
5	Content & Results
6	AP / Expenses & the Estimate Ledger
7	Calendar — feeds, partner pull, Notion push
8	Merch Desk
9	Landing Pages & UTMs
10	Updates & Reports
11	Disclaimer Library & the live workbook
12	Contacts & Brand Playbooks
13	The Guide — the living book
14	The Brand One-Pager
15	Integrations — what is live, honestly
16	Quick reference

A note on honesty. Every status in Mayhem means what it says. “Sent” means real mail went out. “Synced” means Notion confirmed it. “Verified” means the pixel was actually found on the actual page. Where the system cannot know, it says so and flags a human — it never pretends.

1 · HOME — THE OPERATING PULSE

HOME: EVERY BRAND'S OPEN FLAGS, BY MARKET, WITH THE WORST FIRST.

Purpose. The first ninety seconds of the day: every open flag across every brand — stale money, dateless records, unsent tickets, missed returns — with a direct path to the record underneath.

DAILY ROUTINE

1. Open Mayhem — Home is the landing room.
2. Read the flags top to bottom; open the worst one first with its *Open* button.
3. Work the flag where it lives (the record, the ticket, the payment). Flags clear only because the underlying item was fixed.
4. Glance at the five-brand book at right for anything unusual by brand.

The trap: a quiet Home is not a finished department — flags only know what records know. If a deal never entered the book, no flag will miss it. That is why the Calendar and the Guide's Open Loops page get a look even on quiet days.

THE BOOK: BRAND → MARKET → RECORDS.

Purpose. The records themselves. Each record carries its whole life — dates with their why, three-stage money, tickets, obligations, returns, and every source that ever touched it.

2 · THE RECORD, OPEN

A RECORD DOSSIER: LIFECYCLE, WORKSTREAMS, TRUTH PANEL, WHAT THEY OWE US.

TO EDIT ANY FACT

1. Open the record (context bar → *Open*, or from any list).
2. Every fact on the truth panel has an *Edit* button — dates, partner, location, money, estimate. Edits save instantly and push to Notion with their reason.

ARCHIVE RULES

Denied and superseded records move to the archive and stay there — never deleted, never quietly back. Resurrecting one is a deliberate act with a paper trail.

3 · INTAKE — THE FOUR DOORS

The screenshot shows the 'Intake' form in the 'Mayhem & Marketing Ops' system. The interface is dark-themed with a sidebar on the left containing navigation links: Home, Brands, Intake (selected), Tickets, Content & Results, AP / Expenses, Calendar, Merch Desk, Landing Pages & UTMs, Updates & Reports, Disclaimer Library, Contacts, and Guide. The main content area has a top navigation bar with buttons for 'Lerner & Rowe', 'Parrish DeVaughn', 'Keches Law', 'Wettermark Keith', and 'Postman Law'. Below this, there are dropdowns for 'DMA' (Chicago) and 'CAMPAIGN / EVENT' (Chicago Fire FC Partnership), with 'Open' and '+ Intake' buttons. The form title is 'LERNER & ROWE · CHICAGO Intake'. A subtitle reads: 'The form starts the operating system. Select what is true once; Mayhem builds the work, return requirements, Notion record and follow-up from it.' There are buttons for 'Use a source to prefill' and 'Import Spreadsheet (CSV)'. Below these are buttons for 'New Campaign / Event', 'Update Existing', 'Results / Vendor Report', and 'Partner Contact'. The form fields are organized into sections: 'BRAND' (Lerner & Rowe), 'DMA' (Chicago), and 'TYPE' (Event + Sponsorship). The 'CAMPAIGN / EVENT / SPONSORSHIP' section has a 'Name' field. The 'PARTNER / VENDOR' section has a 'Choose saved or enter once' field. The 'START / EVENT DATE' and 'END DATE' fields are date pickers. The 'LOCATION / VENUE' field has a 'Choose known location or enter once' field. The 'PROPOSED \$' and 'CONTRACTED \$' fields are text inputs. The 'CAMPAIGN TOTAL \$' field is a text input with 'Calculated from costs' below it. The 'ESTIMATE #' field is a dropdown with 'Use Existing' selected. A note below the estimate field states: 'No Mayhem-built (EV) estimate on file for this brand yet — choose Assign New or Not Needed. Doom's numbers stay in Doom.' The 'FUNDING ENTITY IF DIFFERENT' field is a text input. The 'OPS OWNER' field is a dropdown with 'Events' selected. The 'FINAL APPROVAL' field is a dropdown with 'Marketing Lead' selected. The 'WHERE DOES THIS RUN / SHOW UP?' section has eight checkboxes: Radio (Audio creative / live mentions), TV (TV spots / tags), Streaming Audio (Streaming audio creative), Display (Display / banner creative), OOH (Billboard / poster creative), Meta (Meta — routed by role), Organic Social (Organic social content), and Email (Email / newsletter content).

INTAKE: THE FORM IS THE CONFIRMATION SURFACE; THE SOURCES DO THE TYPING.

Purpose. How work enters. Four doors, each stamping its source — and by house Law IX, intake is click-through: the system fills, a human confirms.

DOOR 1 — THE FORM

1. + Intake → pick brand, market, type. Channels chosen drive what the deal will need (creative specs, disclaimers, Meta, social, Ethics).
2. Estimate #: *Use Existing* (pick an EV code), *Assign New* (the next EV code is minted automatically), or *Not Needed*.
3. Create → the record files to Notion and the ticket planner opens with the work it needs.

DOOR 2 — A CONTRACT

1. Use *Fill from Source* → drop the PDF (clean or scanned — the reader handles both).
2. Review the extraction preview: anything the reader is unsure of arrives flagged **[Confirm]**, never guessed.
3. Apply → the form fills; confirm and create.

DOOR 3 — A SPREADSHEET

CSV import recognizes records the book already holds and skips them; new rows stage for review.

DOOR 4 — NOTION

Pull from Notion (Updates & Reports) shows every difference side by side — accept theirs, keep ours, or add the new. Nothing merges itself.

4 · TICKETS — THE OUTBOUND MACHINE

TICKETS: AN ASK, AN OWNER, A DUE-BACK, AND WHAT IT PROTECTS.

Purpose. Every request that leaves the desk. A ticket without a due-back is a wish, not a ticket. Routes — Creative, Merch, Social, Meta, Ethics, Partner — each know their recipient; the brand kit line rides every body; creative tickets pull the latest cut from Doom automatically, file links included.

4 • WORKING A TICKET

Ticket

Postman Law • Cincinnati • WEBN Riverfest (Western & Southern WEBN Fireworks)

STAFFING • BOOTH STAFF FOR WEBN RIVERFEST — NAMES + PRICING

The Hype Agency • stephanie@thehypeagency.com Sent

DUE BACK Aug 28 PROTECTS Sep 6 event day

RETURN REQUIRED Staff names + pricing (2 staff confirmed working the booth per Aug 21 load-in email)

Log Return

EMAIL — READY TO COPY INTO OUTLOOK

SUBJECT Staffing — WEBN Riverfest Sep 6 (Postman Law • Cincinnati)

Per Hazel's Aug 19 request: activation booth staffing for WEBN Riverfest, Sep 6, Cincinnati. Two staff confirmed; names and pricing still due back.

Copy Email

A TICKET OPEN: DUE-BACK, RETURN REQUIRED, AND THE EMAIL READY TO SEND OR COPY.

TO SEND A TICKET

1. Open the ticket. Check the ask, due-back, and *Return required*.
2. *Send* mails it through the real rail — in TEST mode every send lands in-house, stamped with its intended recipient, until mail is flipped live. Or *Copy Email* to paste into Outlook.
3. When the answer comes back, *Log Return* — the record gets the proof and the flag clears.

5 · CONTENT & RESULTS

PROOF, NOT VIBES: OBLIGATIONS, CONTENT PLANS, AND POST-EVENT RETURNS.

Purpose. What we are owed back. Every partner obligation lives here with an expected count and a proof source. After an event ends, wrap arms itself: attendance at +1, social metrics at +3, press at +5, recap at +7 — nobody has to remember; the clock does.

The standard: a sponsorship without collected proof is a donation. When renewal talk starts, this room is the argument.

Open

THE WHOLE-BOOK LEDGER: EVERY OPEN DOLLAR, OVERDUE AND DUE-SOON CALLED OUT.

Purpose. Every dollar promised, across the whole book, each a click from its record. Budget check-ins keep money honest: every active record gets a monthly “still accurate” confirmation; thirty days without one goes stale and rides the Monday note.

Vendor fraud rule: a payment request that changes a vendor’s known method — a sudden wire, a new account — gets a phone call to a number we already had. Never a payment.

6 · ESTIMATES — BUILT HERE OR BUILT IN DOOM

DOOM & DELIVERABLES
/ Mayhem & Marketing Ops

DMA Chicago CAMPAIGN / EVENT Chicago Fire FC Partnership Open + Intake

ESTIMATE LEDGER — WHOLE BOOK

An estimate is built HERE (EV series) or built in DOOM (bare numbers) — the two never cross. Mayhem suggests the next EV code itself and never mints, picks, or edits a Doom number; Doom joins below came from Doom's own data and are read-only here. Optional per record, expected on every new one.

LEDGER No estimates assigned anywhere yet.

OPEN RECORDS WITHOUT AN ESTIMATE (51)

—	White Sox Injury Report - ESPN Chicago Lerner & Rowe - Chicago	Assign EV Code
—	Bears Fumble Recovery - ESPN Chicago - Good Karma Broadcasting Lerner & Rowe - Chicago	Assign EV Code
—	Sister Strut - iHeart Lerner & Rowe - Chicago	Assign EV Code
—	Stars & Strings - Audacy Lerner & Rowe - Chicago	Assign EV Code
—	ChiGivesBack Toy Drive - B96 Lerner & Rowe - Chicago	Assign EV Code
—	Chicago Fire FC Partnership Lerner & Rowe - Chicago	Assign EV Code
—	Thanksgiving Meal Giveaway — Albuquerque Lerner & Rowe - Albuquerque	Assign EV Code
—	LOVEPUP Family Fest Phoenix Lerner & Rowe - Phoenix	Assign EV Code
—	STUDIO 215 Gala — Children's Museum of Phoenix Lerner & Rowe - Phoenix	Assign EV Code
—	Thanksgiving Meal Giveaway — Phoenix (GCU) Lerner & Rowe - Phoenix	Assign EV Code
—	Crimson Bells Gala — Salvation Army of Tucson Lerner & Rowe - Tucson	Assign EV Code
—	Thanksgiving Meal Giveaway — Tucson Lerner & Rowe - Tucson	Assign EV Code

Brand → DMA → campaign / event.

THE ESTIMATE LEDGER: EV CODES MINTED HERE; DOOM'S NUMBERS READ-ONLY.

The rule: no cross-contamination, ever. An estimate is built HERE (the EV series — EV26-001, EV26-002...) or built in DOOM (bare 3–4 digit media estimates). Doom's numbers never appear in a Mayhem picker and cannot be typed anywhere; where they exist on a record they came from Doom's own data and display read-only.

TO ASSIGN AN ESTIMATE

1. From the ledger: find the record under *Open records without an estimate* → *Assign EV Code*. Done — the next code is minted and logged.
2. From intake or the record editor: choose *Assign New / Mint next EV code*.

Optional per record — expected on every new one going forward.

7 • CALENDAR

THE CLOCK ON THE WALL: CAMPAIGNS BOLD, DUE-BACKS, PAYMENTS, HOUSE-RULE DEADLINES WITH THEIR WHY.

Purpose. Everything dated, in one place: campaigns and events, ticket due-backs, payment dates, and engine deadlines each carrying the rule that created them. Filter by brand. On the phone the grid becomes a thumb-sized agenda.

FEEDS OUT — PARTNERS SUBSCRIBE ONCE

1. *Feeds / Subscribe* → copy the right link (internal = full book; partner = their brand's events only, never money, never tickets).
2. The partner adds it to Google/Outlook: *Other calendars* → *From URL*. It stays current on its own.
3. The panel diagnoses its own setup and each feed has a *Test* that proves it is live before you hand it out.

PARTNER CALENDARS IN — WITH YOU AS THE GATE

1. *Pull Partner Calendar* → paste their shared calendar address.
2. Review the reconcile list: accept, keep ours, or add. Unmatched locations arrive flagged [**Confirm market**] — never filed silently.

PUSH A MONTH TO NOTION

1. *Push to Notion* → review the list (each marked *New page* or *Update* — no duplicates, ever).
2. Confirm. The honest result reports what landed; failures stay marked *Queued* and ride the next push.

7 · A DAY, OPENED — AND QUICK ADD

DAY DETAIL: EVERYTHING ON THE BOOK THAT DAY, EACH ITEM OPENABLE.

TO ADD STRAIGHT TO A DAY

1. Click the day → + *Add to This Day*.
2. Pick brand, market, type; name it. That is the whole form.
3. The record files itself — to the book and to Notion — and opens as the working context to fill in later.

8 • MERCH DESK

THE MERCHHUB STAND-IN: WORK, STOCK, AND THE APPROVED CATALOG IN THREE TABS.

Purpose. Until MerchHub ships, this room does the job — statuses mirror MerchHub’s eight so migration is clean.

TO GET MERCH FOR AN EVENT

1. *Work* tab → log the need. Picking from the catalog pre-fills real prices and estimates the order live as you set quantities.
2. Existing designs (the design bank) reorder without a design round; new designs loop Creative automatically.
3. The need becomes a ticket to Merch. Track it through the statuses.
4. *Received* adds to inventory; send-outs subtract and log — the stock tab is always the truth of what we hold.

9 · LANDING PAGES & UTMS

HONEST TRACKING: UTMS FROM THE RECORD, PIXEL CHECKS THAT FETCH THE REAL PAGE.

Purpose. The links and tags a campaign stands on. UTMs generate from the record so naming never drifts; landing pages attach to the records they serve.

- **The pixel check is real:** it fetches the actual page and looks for the actual tags. “Verified” means found; “unknown” means the check could not tell — and it says so.
- **Sync stamps tell the truth:** “Synced” means Notion confirmed it; “Queued” means it has not, and it rides the next push rather than pretend.

WHAT LEADERSHIP SEES: THE MONDAY NOTE, SCOPED SENDS, AND EXPORTS.

Purpose. The Monday note gathers the week itself — what moved, what is due, whose plate is overloaded (three or more due-backs in a week flags a collision), and what money went stale. Every report knows its audience and brand scope; cross-brand leaks are blocked at the door.

TO SEND THE MONDAY NOTE

1. *Generate / refresh* → read it. It is built from the book, not from memory.
2. Adjust recipients if needed (toggles), then *Send + stamp*. In TEST mode it lands in-house first — rehearse on yourself.
3. Need a file? *Export current update*, *Export Data (CSV)*, or the leadership Excel.

11 · DISCLAIMER LIBRARY & THE LIVE WORKBOOK

The screenshot shows the 'Disclaimer Library' interface within the 'Mayhem & Marketing Ops' system. The top navigation bar includes 'DOOM & DELIVERABLES' and a list of law firms: Lerner & Rowe, Parrish DeVaughn, Keches Law, Wettermark Keith, and Postman Law. The left sidebar contains a navigation menu with options like Home, Brands, Intake, Tickets, Content & Results, AP / Expenses, Calendar, Merch Desk, Landing Pages & UTMs, Updates & Reports, Disclaimer Library (selected), Contacts, and Guide. The main content area is titled 'Master Disclaimer Library' and displays statistics: 8 BRANDS, 14 REFERENCE DMA ROWS, 12 CHANNEL TYPES, and 11 GAPS / PENDING. Below these are sections for 'LIBRARY GUARD' (listing operating markets and dataset drift) and a search interface for 'Lerner and Rowe' across various channels. The search results are categorized into 'OOH / BILLBOARDS' and 'DISPLAY ADS (PROGRAMMATIC / BANNER)', each with a table of disclaimer language and status (e.g., APPROVED, GAP / PENDING).

THE GUARD: MARKET-TRUE LANGUAGE, BLIND SPOTS FLAGGED, THE LIVE EXCEL READABLE ON DEMAND.

The rule it enforces: state-bound language never crosses a state line. Required blocks attach only in the states that demand them; per-state blocks split so each market gets its own block only; a record in a market the library does not cover routes to **Ethics** instead of guessing.

THE LIVE WORKBOOK

1. On this page, paste the SharePoint link to the disclaimer Excel once (*Add SharePoint Link*).
2. *Read the Live Workbook* fetches the current sheets on demand: what maps to the library, and a loud **NOT in the library** — **review** on anything new.
3. Nothing legal applies itself — the enforcement library changes only by a person's hand.

12 · CONTACTS & BRAND PLAYBOOKS

THE ONLY ROOM WITH NAMES — PLUS KITS, PLAYBOOKS, AND THE DOCUMENT LINKS.

Purpose. Law VIII lives here: every human being — internal seats, brand counterparts, vendors, venue logistics — with numbers, emails and notes. Also the brand kits (palettes, fonts, the Canva kit), activation playbooks, and merch design banks.

SHAREPOINT DOCUMENT LINKS

1. Any kit or playbook without a link shows *Add SharePoint link* — paste it once.
2. From then on the real link rides every Creative / Merch / Social ticket and the Brand One-Pager automatically.

13 · THE GUIDE — THE LIVING BOOK

THE BOOK GREETES EVERY ENTRY.

31 PAGES: THE MANUAL AND THE LIVE STATE OF THE OPERATION.

Purpose. The department's manual and memory, kept as a book. The front half is how the operation is meant to run; the back half rewrites itself from the system every time it opens — compliance map, seats, open loops, the living record.

- **It reads live:** counts, loops and rosters are as of right now, never a stale document.
- **It writes back:** the pencil on any written page lets anyone rewrite it in their own words — saved for everyone, original recoverable, every edit logged.
- **Self-writing pages have no pencil** — freezing live data into text is how documents learn to lie.

14 • THE BRAND ONE-PAGER

ONE CLICK: THE WHOLE BRAND ON A PAGE, READY TO SEND TO A BRAND MANAGER.

TO BRIEF A BRAND MANAGER

1. Brands room → *Brand One-Pager*.
2. Review: upcoming calendar (dated + TBD), budget rollup (proposal money excluded, and it says so), latest creative out of Doom with file links, merch in flight and on hand, brand kit links, key contacts.
3. *Copy for Email / Teams* → paste. When mail goes live, the page can send itself.

15 · INTEGRATIONS — WHAT IS LIVE, HONESTLY

SYSTEM	STATUS	WHAT IT MEANS
Notion	LIVE, both ways	Records push on create and edit (update-in-place, no duplicates); pull shows every difference for a human decision; any calendar month pushes on demand.
Doom creative	LIVE	The ISCI registry streams in on every load; latest cuts with file links ride creative tickets and the one-pager.
Mail	LIVE — test mode	Real sends through the real rail; every send lands in-house stamped with its intended recipient until the switch flips.
Contract reading	LIVE	Clean or scanned PDFs extract into intake; uncertainty arrives flagged, never guessed.
Calendar feeds	BUILT — awaiting tokens	Subscribe links go live the moment the feed tokens are set; the panel walks the setup and tests itself.
Partner calendar pull	LIVE	A partner's shared calendar reconciles in with a human as the gate.
SharePoint documents	LIVE — link once	Kits, playbooks and the disclaimer workbook link in-app; the workbook reads on demand.
MerchHub	BLOCKED	The Merch Desk stands in; statuses mirror MerchHub for a clean migration.
Email ingestion	PENDING IT	Shared mailbox + Graph approval requested; until then, emails merge by hand with receipts.
Outlook internal feed	IT-BLOCKED	Tenant policy blocks internet calendar subscriptions; built and parked.

16 · QUICK REFERENCE

THE HOUSE CLOCK

- Creative due back: **launch -11** (four days of review before the package).
- Assets to campaign vendors: **launch -7**. Both roll off weekends automatically.
- Wrap after an event: attendance **+1** · social metrics **+3** · press **+5** · recap **+7**.
- Stations turn creative in 1–3 days — never promise a vendor faster than creative can deliver.
- Three or more due-backs on one person in a week = collision flag, on the calendar and the Monday note.

MONEY

- Three numbers, never blurred: proposed → contracted → final.
- Funding entity ≠ brand — ask every time.
- Estimates: EV series minted here; Doom's numbers stay Doom's. No typing, no crossing.
- Monthly budget check-ins; 30 days stale rides the Monday note.

COMPLIANCE

- State-bound language never crosses a state line; unknown markets route to Ethics.
- Ethics answers go INTO the library so the same question never flags twice.

WHEN THINGS JAM

- Feed says “not configured” → the deploy hasn't caught up; redeploy and Re-check.
- Notion push says Queued → Notion didn't answer; nothing lost, rides the next push.
- A send arrived in-house → that is TEST mode doing its job.
- Anything else → walk the spine: find the record, read its sources, the jam names itself.

Nothing about this operation lives only in somebody's head. — The Guide, page one
